Started in a workshop, grown on referrals.

Advanced Automation Systems was built on a simple idea: do the electrical and automation work properly the first time, so the client never has to think about it again. From single panel installations to full plant automation, our team handles design, supply, installation, and commissioning under one roof.

03 — MISSION & VISION

Our Mission

To deliver innovative, reliable, and safety-driven electrical, automation, and instrumentation solutions that empower industries across Kenya to operate at peak efficiency.

Our Vision

To be East Africa's most trusted partner for industrial automation and electrical engineering — recognized for precision, integrity, and forward-thinking solutions.

05 — ELECTRICAL INSTALLATIONS & SERVICES

End-to-end electrical works and technical consultancy.

From panel building and cable installation to safety audits, design reviews, and project commissioning.

- ✓ Low voltage switchboards and distribution panels
- ✓ Cable laying
- ✓ Machine assembly and installation
- ✓ Transformer testing and maintenance
- ✓ Insulation resistance test
- ✓ Earth resistance test
- ✓ Power quality analysis
- ✓ Technical electrical safety audits
- ✓ Technical design reviews
- ✓ Independent engineer and commissioning services
- ✓ Project management

Sensors and measurement equipment that keep your process visible.

Temperature Sensors

Accurate process and environmental monitoring.

Flow Meters

Precise liquid and gas flow measurement.

Level Sensors

Reliable tank and vessel level detection.

Pressure Sensors

Continuous pipeline and vessel monitoring.

HVAC Sensors

Air quality, humidity, and climate control.

Proximity Sensors

Non-contact detection for automation and safety.

07 — PRODUCT SUPPLIES

Components and equipment sourced right, from breakers to PLCs.

MCB, MCCB, RCCB

Circuit breakers and residual current devices for protection.

Relays

Control and protection relays for switching circuits.

PLCs, HMIs & Software

Programmable controllers and operator interfaces.

Variable Frequency Drives

Precise motor speed and torque control.

Digital Multimeters

Handheld meters for voltage, current, and continuity.

Test & Measurement Equipment

Instruments for diagnostics and calibration.

Push Buttons & Indicators

Panel-mount controls and indicator lights.

Cables

Power, control, and communication cabling.

Networking Equipment

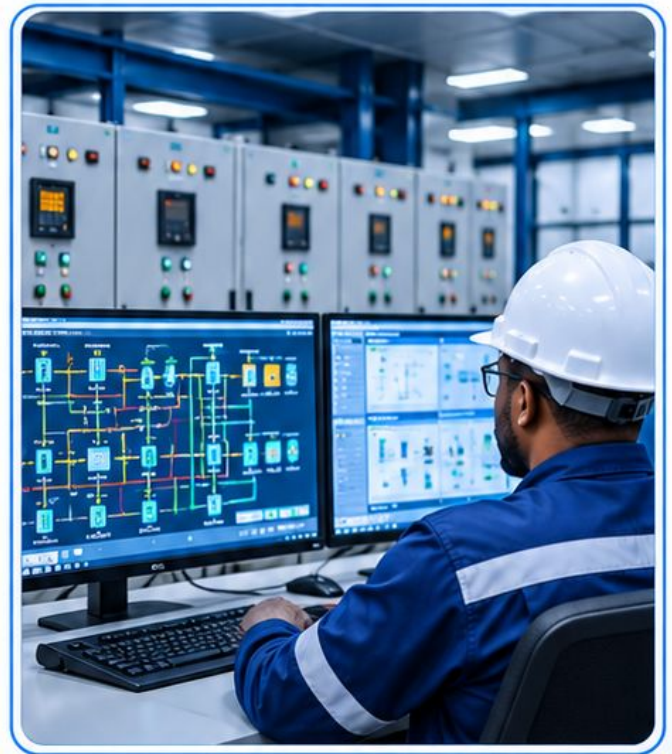

Switches, routers, and industrial networking gear.

Full control and automation system integration, backed by advanced power system studies.

Keeping your network stable, compliant, and ready to scale.

- ✓ Lighting systems
- ✓ Building management systems
- ✓ Temperature control systems
- ✓ SCADA systems
- ✓ MCC panels: DOL starters, star-delta, forward-reverse & VFD
- ✓ Process automation
- ✓ Energy management systems
- ✓ Mains & genset changeover panels

09 — CONSULTING & POWER QUALITY ANALYSIS

Consulting

Expert guidance before, during, and after your project.

- ✓ Diagnostics and troubleshooting services
- ✓ Application design
- ✓ PLC & drives programming training
- ✓ Turnkey engineering project design
- ✓ Hourly consultation services

Power Quality Analysis

Energy data logging and analysis to optimize efficiency and system performance.

- ✓ Active power (kW) monitoring
- ✓ Apparent power (kVA) analysis
- ✓ Power factor (PF) assessment
- ✓ Over-voltage and transient detection
- ✓ Frequency deviation (Hz) monitoring
- ✓ Remote, real-time power logging

10 — SCADA & VARIABLE FREQUENCY DRIVES

SCADA

Real-time visibility and control of your process, from the control room or the field.

- ✓ Real-time process monitoring dashboards
- ✓ Historical data logging and trending
- ✓ Remote supervisory control
- ✓ Alarm management and notifications
- ✓ Integration with existing PLCs and instrumentation
- ✓ Custom HMI screen design

Variable Frequency Drives

Precise motor speed and torque control that cuts energy waste and extends equipment life.

- ✓ VFD sizing, supply, and installation
- ✓ Motor speed and torque control
- ✓ Energy-saving retrofits for existing motors
- ✓ Fan, pump, and conveyor drive applications
- ✓ Drive programming and parameter tuning
- ✓ After-sales support and troubleshooting

Industrial Wireless Communication

Reliable wireless links for monitoring and controlling remote sites without laying cable.

- ✓ Remote site monitoring without cabling
- ✓ Level, temperature, and flow signal transmission
- ✓ Water and sewerage infrastructure applications
- ✓ Pumping stations and well point systems
- ✓ Leak monitoring
- ✓ Long-range, multi-station wireless networks

Pump Monitoring Systems

Catch pump and motor faults early, before they become costly failures.

- ✓ Continuous pump and motor power monitoring
- ✓ Early fault detection via power signature analysis
- ✓ Reduced unplanned downtime
- ✓ Condition-based maintenance scheduling
- ✓ Integration with existing control systems

From first call to running system.

01

Assess

We walk the site, review existing drawings, and scope the real problem before quoting.

02

Design

Panel layouts, control logic, and cable schedules are drawn up and signed off before we touch a wire.

03

Build & Install

Panels are built and tested on our bench, then installed and commissioned on site.

04

Support

Documentation is handed over, and we stay reachable for maintenance and call-outs after go-live.

SITE ASSESSMENT

PANEL BUILDING & TESTING

INSTALLATION & COMMISSIONING

13 — WHY CHOOSE US

Seven reasons clients stay with us.

Certified & Compliant

Electrical work delivered to recognised national safety standards, backed by rigorous audits and design reviews.

Fast Turnaround

Same-day quotes and responsive project scheduling, so your timeline never stalls.

Proven Expertise

Deep experience across manufacturing, water treatment, cold chain, and industrial automation.

Client-First Support

Direct access to our engineering team from first quote through to project handover.

24/7 Support

Round-the-clock response for urgent faults and emergency callouts, whenever they arise.

Nationwide Coverage

On-site teams and support reaching clients across Kenya, not just in major towns.

Transparent Pricing

Clear, upfront quotes with no hidden costs, so you know exactly what you're paying for.

14 — SECTORS WE SERVE

Trusted across Kenya's key industries.

Manufacturing

Beverage & Bottling

Water Treatment

Warehousing & Logistics

Cold Chain & Storage

Commercial Buildings

Textile & Processing

Agriculture

15 — CERTIFICATIONS & COMPLIANCE

Held to a higher standard.

**EPRA-Aligned
Practice**

**EBK & IEK
Standards**

**ISO-Aligned
Safety Systems**

**NCA-Compliant
Installations**

**Electrical Safety
Compliance**

Work carried out to recognised national electrical safety standards.

**Vendor-Trained
Technicians**

Staff trained on the PLC and control brands we install and service.

Insured & Licensed

Fully licensed to operate as an electrical and automation contractor.

16 — BRANDS WE WORK WITH

Backed by names you trust.

We install, program, and support equipment from leading industrial brands.

SIEMENS
Ingenuity for life®

Schneider
Electric™

ABB®

FLUKE®

PHOENIX
CONTACT®

 **Greystone**®
